PROFESSIONAL SUMMARY

Information Technology graduate with hands-on experience in IT Helpdesk support, local network infrastructure (LAN/WAN), and database backup. Proactive and responsible in maintaining hardware/software systems, resolving technical incidents, and ensuring continuous operational uptime in enterprise environments.

TECHNICAL SKILLS

Technical Support	Windows OS installation/configuration, computer hardware, software, and printers.
Network	LAN/WAN infrastructure operation, basic configuration of Routers, Switches, and Access Points.
Databases	PostgreSQL, MySQL, SQL Server; performing data backups and recovery operations.
Programming & Web	Basic Python, C#, HTML/CSS/JS; WordPress website administration and optimization.
Languages	English (Professional working proficiency, read technical documentation).

WORK EXPERIENCE

SOJO Company <i>IT Staff</i>	January 2026 – Present <i>Phan Thiet, Binh Thuan</i>
- Manage IT infrastructure consisting of 50+ workstations, network devices, and office printers, securing 99.8% system uptime. - Provide technical support, resolving 95% of hardware, software, and network incidents (LAN/WAN) within a 30-minute SLA. - Coordinate with software vendors to update, maintain, and resolve bugs in internal enterprise applications. - Automate weekly backups for corporate PostgreSQL/MySQL databases to ensure data integrity and zero data loss.	
The Sailing Bay Resort <i>IT Helpdesk & Network Intern</i>	Sep 2025 – Nov 2025 <i>Mui Ne, Phan Thiet</i>
- Delivered technical IT support for 80+ end-users across 5 resort departments, resolving hardware and software issues. - Assisted in configuring Access Points and maintaining LAN/WAN network infrastructure to secure resort-wide connectivity. - Performed physical hardware troubleshooting and basic maintenance for resort's VoIP telephone systems and peripherals. - Assisted in onboarding new employees on specialized Property Management System (PMS) hospitality software.	

KEY PROJECTS

Hotel Management System & AI Chatbot <i>C#, SQL Server, .NET Framework, OpenAI API (Graduation Thesis)</i>	August 2025 – December 2025
- Developed a desktop application for hotel reservations and customer services using C#, SQL Server, and .NET Framework. - Optimized database queries, reducing data search latency to under 1.5 seconds.	

- Integrated OpenAI API to deploy a 24/7 AI Chatbot for automated customer inquiry responses.
- Repository: github.com/ankhang0704/QuanLyKhachSan_AI

Website KOI Phan Thiet

February 2026 – March 2026

WordPress, Elementor, PHP, MySQL, SEO Plugins (Freelance Project)

- Built and optimized an SEO-friendly WordPress website, achieving 85+ speed performance score on Google Lighthouse.
- Configured security plugins and firewall rules, blocking 99% of daily automated spam and brute-force attacks.
